

SHANA RUSSELL

Friendswood, TX 77546 | 281-221-4694 | shanarussell00@gmail.com | linkedin.com/in/shanarussell | github.com/shanarussell

Current Merit America (Java/web development) boot camp student with a background in IT support, administration, training and graphic design. Over 20 years of experience working on HTML projects and 6 years of experience creating personal iOS projects. Seeking a full time remote role in front-end development.

RELEVANT SKILLS

Languages: Java, JavaScript, SQL

Front End: React, Redux, Bootstrap, HTML5, CSS, Jest

Back End: Spring Boot, PostgreSQL, JUnit

Development Tools: IntelliJ, Visual Studio Code, pgAdmin, Git

Methodologies: Agile, CI/CD, Microservices

SOFTWARE PROJECTS

[Text Based Vending Machine](#) | Virtual Vending Machine Application | **Java, OOP, File I/O**

Virtual vending machine application with command-line interface allowing users to deposit money, choose a product, and return the correct change. Inventory is loaded via a text file and transactions are also logged to a text file.

[NiteFan](#) | iOS and AppleTV app | **XCode, Swift, Illustrator, Photoshop**

White noise app for those who like to sleep with a fan. Plays the sound of 4 different fans, plus a few extra sounds. Users can mix the fan sounds to find the perfect one.

[Sticky Puns](#) | iMessage Sticker app | **XCode, Illustrator, Photoshop**

Collection of punny stickers that runs through the iMessage application on iPhone and iPad OS

[TEnmo](#) | Money Transfer Application | **Java, Spring Boot, PostgreSQL, RESTful API, Spring Data JPA, Spring Security**

Peer-to-peer money transfer application allowing users to send, request, and approve money transfers. Front-end is a command-line interface which communicates with a RESTful API server in the back-end.
